

CSI: NEW YORK STAR MELINA KANAKAREDES SULTRY LOOKS ARE THANKS TO HER MEDITERRANEAN GENES. HERE'S HOW YOU CAN GET THE TV COP'S GLAMOROUS STYLE

Thanks to Physicians Formula, we are giving four TV SOAP readers the chance to win a make-up pack valued at up to \$102.80 comprising all the make-up featured here! To win fill out the coupon on page 49 and send it in

Make-up Hair

Apply foundation, then lightly dust over loose face powder for a matt, yet natural base. Using your powder brush, sweep a rosy blush across your cheekbones to achieve Melina's natural, rosy glow.

TRY 1 Physicians Formula Mineral Wear Liquid Foundation, and **2** Physicians Formula Cheek Palette in Rose, both \$24.95.

Start with an eyeshadow in brown on the eyelid up to the crease of your eye. This darker shade is perfect for hazel or brown eyes like Melina's. Run a black eyeliner in a thick line along the upper lash line to enhance your lashes. Apply a black mascara to add volume and thickness to your own lashes. Finish off your look with your favourite bright colour lipstick

TRY 3 Physicians Formula Shimmer Strips Custom Eye Shadow in Brown Eyes, **4** \$27.95, and Physicians Formula Organic Wear Mascara in Ultra Black, \$24.95.

If you have curly hair start by detangling it before cleansing with a shampoo designed to add back moisture and to treat coloured or highlighted. Towel dry then apply a volume-enhancing product to the roots. Use a curl-enhancing cream, balm or mousse from roots to ends.

If desired part your hair depending on how you wish to style it. No part is just as beautiful with this hairstyle. Starting on one side, take a 5cm section, clipping the rest of the hair out of the way, and blow dry with a round bristle brush. When dry, roll the section in a Velcro roller or similar, or use your fingers to create a spiral and it up. Repeat the same steps all over until all the hair dry and rolled. If you hair is naturally curly, don't use fingers to blow dry since this can add to frizz.

Each section at a time, roll around a curling iron in a spiral pattern. Gently slide the curling iron out from under the curl and pin up in a spiral pattern. Repeat until all sections are curled, pinned and allowed to cool.

Once cool, remove the pins and use your fingers to arrange the spirals. Apply a light pomade or cream and gently twist each curl for additional hold if you like. For a more unstructured look, use your fingers to rake curls or bend over and shake out the curls.

Finally, apply a shine serum, shine spray or hair cream to seal in moisture and add a shimmering shine like Melina. Hairspray is optional. For structure and definition consider accessorising with a headband, bobby pins or barrette.

Lash Out

Make an even more dramatic statement by enhancing your eyes with false lashes. Apply a small amount of eyelash adhesive directly on the false lash, concentrating it on the plastic strip that holds the lashes in a line. Next, carefully set the false lash just above your own lashes, on your eyelid, and press firmly on the glue to help set it. When dry, carefully touch up your eyeliner and mascara as necessary.

Up, Down To The Side

Although ringlets look gorgeous when allowed to cascade down, you could also try these styles:

- 1** Pull back into a loose nape-based chignon.
- 2** Loosely pull back your hair at the sides and pin at the crown for a half up-half down style, allowing the rest of the coils to cascade down.
- 3** Creating a deep side part or adding a few ringlets along the hairline completely alters the look.

Stuff we love

Keep that summer glow even in winter with **Fake Bake's Face Platinum anti-ageing self tan lotion**. For stockists call 1300 787 587
