GET GLOWING

A GOOD SKINCARE AND FOUNDATION ROUTINE CAN CREATE A CLEARER COMPLEXION, BUT BRIGHTENERS AND ILLUMINATORS ARE KEY IN ACHIEVING LUMINOUS SKIN. **NICOLA DONOVAN** REPORTS.

As we age, our skin tends to become less reflective of light. Brighteners work to address this dulling of colour, while illuminators act to reflect light and define your facial features. Discover the important roles of these glowing products in this showcase of brighteners and illuminators.

A good face brightener will hydrate and rejuvenate the skin as well as illuminating it. But if you want to create even more luminosity and contour, an illuminator will highlight your skin and reflect light as well as contour facial features such as the cheekbones, brow bones and the bridge of your nose.

For example, a wide nose can seem smaller when illuminator is applied down the centre of the nose. Applying illuminator to the edge of a smaller feature, such as the cheekbones, will help that feature stand out. **csbm**

1. Babor Perfect Skin Illuminator, RRP \$68
2. YSL Touche Eclat (Radiant Touch), RRP \$55
3. YSL Mineral Sheer Veil, RRP \$89.50
